

Linux wargames by OTW			Port used: 2220	Solved by Pallavi Khadse
LEVEL	FIND	USERNAME	OBTAINED PASSWORD	SOLUTION
15	find password to level 16	bandit15@bandit.labs.overthewire.org	kSkvUpMQ7lBYyCM4GBP vCvT1BfWRy0Dx	# for connecting to the SSL/TLS port use the following command <pre>openssl s_client -connect localhost:30001 ></pre> #the service will be connected, you just need to paste the password of bandit15 and that checks if the given password is correct. If correct, it gives the password for the next level.
16	find password to level 17	bandit16@bandit.labs.overthewire.org	Note: Password is the SSH private key (which starts with "-----BEGIN CERTIFICATE-----" and end with "-----END CERTIFICATE-----" saved in the localhost (my computer at C:\Users\k_pal), named as: bandit17.key	# for scanning which ports are open on the network / have a server listening on the ports, use: <pre>nmap -p 31000-32000 localhost ></pre> #to check which port speaks SSL/TLS, use the following: <pre>nmap -sV -p 31000-32000 localhost ></pre> #logged out from bandit16 and use my computer and open cmd, use the following to log-in to bandit17 level <pre>ssh -i bandit17.key bandit17@bandit.labs.overthewire.org -p2220 ></pre>
17	find password to level 18	bandit17@bandit.labs.overthewire.org	x2gLTTjFwMOhQ8oWNbM N362QKxfRqGIO	<pre>ls -la ></pre> <pre>diff passwords.old passwords.new></pre> # Password for level bandit18 is followed by ">" which is in "passwords.new" file
